NousPratIT

AT A GLANCE

2025

Corporate Goal

Our company creates useful and innovative business IT solutions and transfers Smile and Reliability, both inside the company as well as outside, to companies and Organizations in Greece and Abroad.

Our Goal

- To prove to be a valuable and important partner of Businesses and Organizations in the field of Computer Support, Organization and Innovation.

- To be a company that each of us will grow personally and professionally, complement each other, and offer Production and Knowledge.

Critical questions of our customers

- How can I automate the operations and processes of the company?

- How can I model my business environment?

- How can I utilize information in order to make business decisions?

- How can I perform the maintenance of critical facilities?

- How can I ensure the quality and correctness of the company's products?

Comparative advantages

NousPratIT

- We create our own, modular technology platform for developing cloud commercial applications (Synapsis Engine) on Microsoft's cutting-edge technologies. (.NET 9 .NET MAUI).

- Creating Innovative Solutions with the utilization of the platform in the fields of Asset Management and Work Order Management.

- We are one of the few companies that implement Entersoft ERP and Soft1 ERP solutions.

- We have a very strong department and infrastructure regarding QA.

- We are one of the few companies that work and collaborate with Microsoft, IBM and Oracle.

NousPrat**IT**

- We create our own cloud and mobile business application development platform, based on all modern Microsoft tools, to enable the market to take advantage of new cloud and mobile computing technologies.

- We implement specialized solutions such as Asset Management and Work Order Management.

- We create modern and flexible UI in our applications (mobile and web) so that maintenance and installation technicians who are not familiar with the technology, very easily with a few moves, can make efficient and error-free recording and maintenance of critical and important equipment and facilities.

NousPratIT

- We implement modern cloud and mobile applications in such a way that they can be easily integrated by the business environment of a company.

- IoT, AR and Machine Learning technologies are used in the platform (e.g. Asset Management AR, QR, ML) and there is full possibility of integration with third party applications.

- We invest in various innovative technological solutions, e.g. we create a global social network of athletes (Portal) like Linked.In.
